## **ADAPTIVE WIRELESS SOLUTIONS, LLC PARTNER AKS TECHNOLOGIES RELEASES IPro3000 PORTABLE DATA LOGGER**

**HUDSON, MA** – Adaptive Wireless Solutions, LLC (AWS) the market leader for custom design and manufacture of tether-free measurement and control systems is pleased to announce that business partner AKS Technologies has released the iPro3000, a new addition to the DataPORT line of wireless measurement, logging and data transfer devices. The iPro3000 wireless base station is a robust portable data logger with a color touch screen display for viewing up to 100 wireless sensors including tank level, flow rates and volumes, pressures, temperature etc. Applications include hydro-testing, well testing, frac (DFIT) monitoring, well clean-out and more. AKS can customize the iPro and sensor setup to any industry application. For more details, see <http://www.aks-technologies.com/redirect.php?Site=http://www.aks-technologies.com/files/brochures/DataPort%20Brochure.pdf&Time=500>

AKS Technologies is an innovative designer and manufacturer of advanced measurement tools and recording instrumentation. AKS also provides a wide range of services including data management, site surveys and installation services, repair and calibration.
